2027 SALES · OCTOBER 2026

Today's Run-Rate and 2027 Targets

Part 1: what the last 45 days say about 2026 and 2027, store by store, against the budget. Part 2: the 2027 sales targets for each store manager.

Nine existing cafés and La Jolla Cove · Toast POS net sales through October 14, 2026
Reviewing "2027 Sales Objectives by Café – Investors" (prepared by the CFO, October 2026)
Prepared October 15, 2026

2026 and 2027 at today's run-rate match the budget. The split by store does not.

01 **2026 holds.** At today's run-rate the nine cafés finish 2026 at $27.79M, −0.3% against the budget's $27.88M; 79% of the year is already booked.

02 **The 2027 budget is today's level.** Held flat with normal seasons, the nine sell $28.89M in 2027, +0.2% against the budget's $28.82M: the budget assumes no growth from here.

03 **But the split by store is off.** Set each café to its own run-rate and Beverly Hills, Del Mar Café, Carlsbad, Little Italy go up (+$338K); Coronado, Newport Beach, La Jolla Café, La Jolla Juicery, Brentwood come down (−$268K).

04 **Manager targets: the October 15 budget, along our forecast.** Each café's objective in the October 15 budget, spread month by month along our most accurate forecast (−2.9% on it for the nine): $30.67M for the nine (+10.3% on 2026) and $868K for La Jolla Cove with its remodel, $31.53M in all, by month, day and store.

05 **What the targets ask.** 6.2% more than the run-rate for the nine, about $148K a month: from 2% at Del Mar Café to 17% at Brentwood and 7% at Coronado.

NINE EXISTING CAFÉS	BUDGET	TODAY'S RUN-RATE	MANAGER TARGET
2026 finish	$27.88M	$27.79M	–
2027	$28.82M	$28.89M	$30.67M
2027 growth	+3.4%	+3.9%	+10.3%

Growth on each column's own 2026 finish. Run-rate = the last 45 days of Toast sales, seasonally adjusted and held flat (Coronado, La Jolla Juicery and Newport Beach set a little higher by management). Target = each café's objective in the October 15 budget, along our forecast (three forecasting models, blended).

WITH THE COVE Adding La Jolla Cove (remodeled October 2027): budget $29.69M, run-rate objective $29.76M, manager target **$31.53M**. New cafés are not in these numbers.

A run-rate answers one question: what does each café sell if it simply holds today's level, with its normal seasons and no further growth?

Monthly net sales, nine existing cafés

Actual through September 2026 · from October: today's run-rate held flat, and the budget · bars: growth vs the same month last year, same cafés

01 Take each café's net sales for the last 45 days in Toast: August 31 to October 14, 2026.

02 Remove the season: divide each day by its usual pattern (day of week, time of year, holidays), learned from four years of the café's own sales.

03 That gives the café's underlying daily level today.

04 Hold it flat, put the normal seasons back and add up: the rest of 2026 and all of 2027, with no further growth.

Cross-check without a model (the 12-month average around September 2025, lifted by the 45-day growth on the same weekdays): within 5% for each of the nine cafés.

Sales, last 45 days nine cafés	Sales vs same days last year	Checks vs same days last year
$3.26M	**+17.0%**	**+12.0%**

Most of that rise is already in 2026's sales: held flat, today's level gives 2027 just +3.3% over the 2026 finish (+3.9% with Coronado, La Jolla Juicery and Newport Beach set a little higher by management).

2026 finish: today's run-rate lands within 0.3% of the budget

79% of the year is booked. The budget estimates October–December at each café's Q3 growth rate; the run-rate holds today's level with no further growth, so it lands a little lower for most cafés.

Del Mar Café appears as Carmel Valley in Toast. The budget's January–September for Beverly Hills comes from its September sales report, $18K below Toast.

2027 at the run-rate lands within 0.2% of the budget: it is a no-growth plan

Held flat with normal seasons, the nine cafés sell $28.89M in 2027 against the budget's $28.82M: +3.9% and +3.4% on their own 2026 finish, growth already locked in by 2026's rise and nothing more.

Growth the budget needs = budget 2027 ÷ 2027 at the run-rate – 1. A negative figure means the budget sits below the run-rate: it is met even if sales slip by that much. † Run-rate set by management to Coronado +1.2%, La Jolla Juicery +1.5% and Newport Beach +1.9% on 2026 (the last 45 days alone give –1.5%, –1.2% and +0.6%).

Growth held at +14% to +23% a quarter; at the run-rate it fades to +1% by Q4 2027

Same-store sales of the nine existing cafés against the same quarter a year earlier. At the run-rate, growth fades through 2027 (+8.4% in Q1, +1.0% in Q4) as each quarter meets a 2026 quarter already at that level. The budget drops to +3.3% from the first quarter; the targets in Part 2 keep +9% to +12%.

Same-store: a café counts once it traded the same period in full a year earlier. Small figures give the number of cafés when fewer than nine (Newport Beach and Beverly Hills opened in 2023, Brentwood and Carlsbad in 2024). 2026 Q4 in italics: estimate. Budget: against its own 2026. Target: Part 2, against the 2026 finish. The 2027 run-rate includes the management adjustments to Coronado, La Jolla Juicery and Newport Beach.

Set each café to its run-rate: four go up, five come down

The total barely moves (+$70K for the nine), but the budget asks some cafés for growth and gives others room. Setting each café to its own run-rate fixes the split.

+42.6%	**+20.4%**	**+34.0%**

Held at its last-45-day level with normal seasons, Beverly Hills sells $2.90M in 2027, $139K more than the budget's $2.76M. It is still accelerating: +34.0% for January–September and +42.6% in the last 45 days, with checks +20.4%. About half the growth is more guests, half a higher average check.

RAISE TO RUN-RATE Proposed 2027 objective: $2.90M, +$139K against the budget (today's run-rate, no further growth).

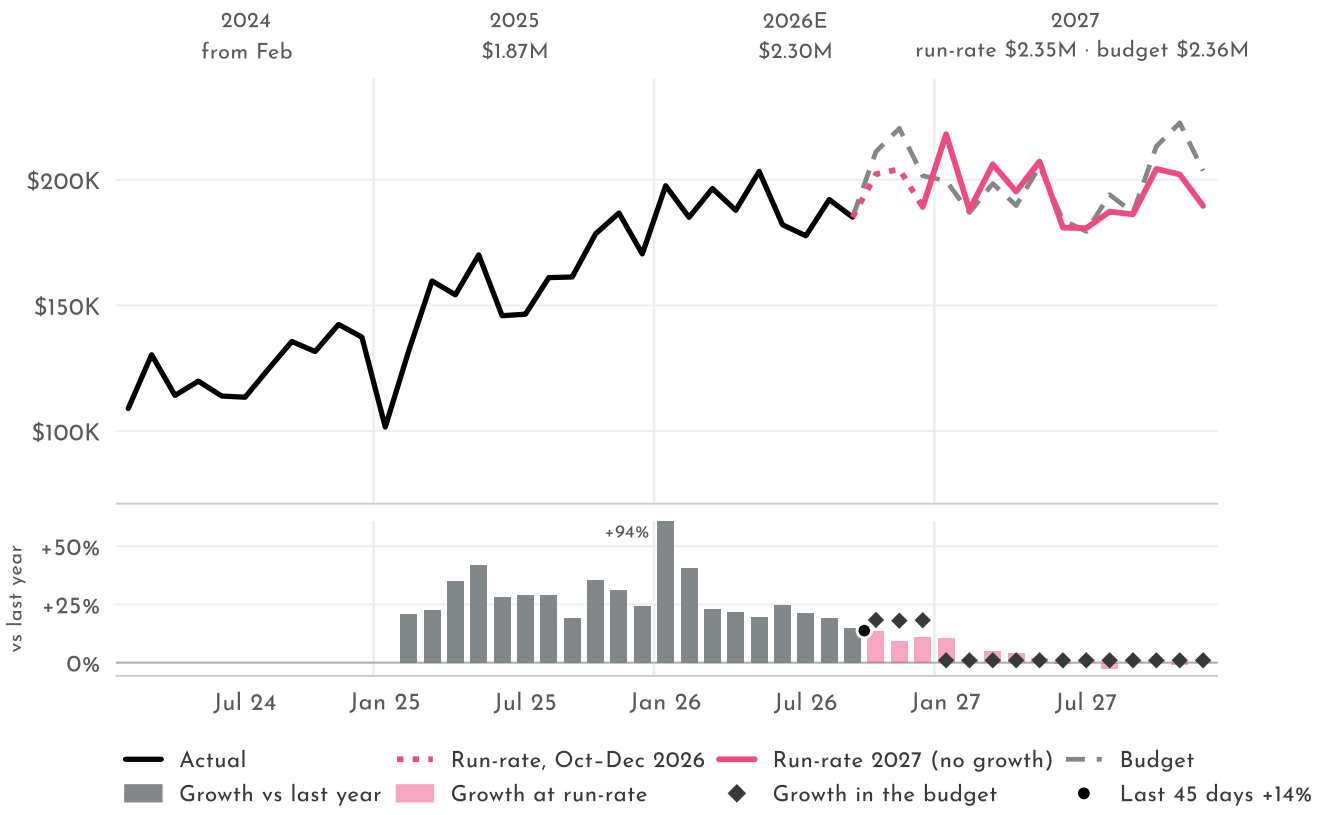

The budget's January–September 2026 (its September sales report) is $18K below Toast, so its Q3 growth reads +41.1% against +43.4% in Toast.

The hotel around the Cove has been under remodel since March 2026, so the café is open but soft (−3.0% for January–September). At today's level it sells $493K in January–September 2027 ($637K for the full year); adding the budget's $125K a month from the October 1, 2027 reopening gives $868K, in line with the budget's $868K.

RUN-RATE + REMODEL Proposed 2027 objective: $868K, +$1K against the budget (run-rate to September, then the remodeled $125K a month).

PART 2

2027 manager targets

Targets that keep each store growing with its trend, month by month.

01 The targets, store by store

02 How they are built

03 Monthly targets for each store

04 Tracking them through 2027

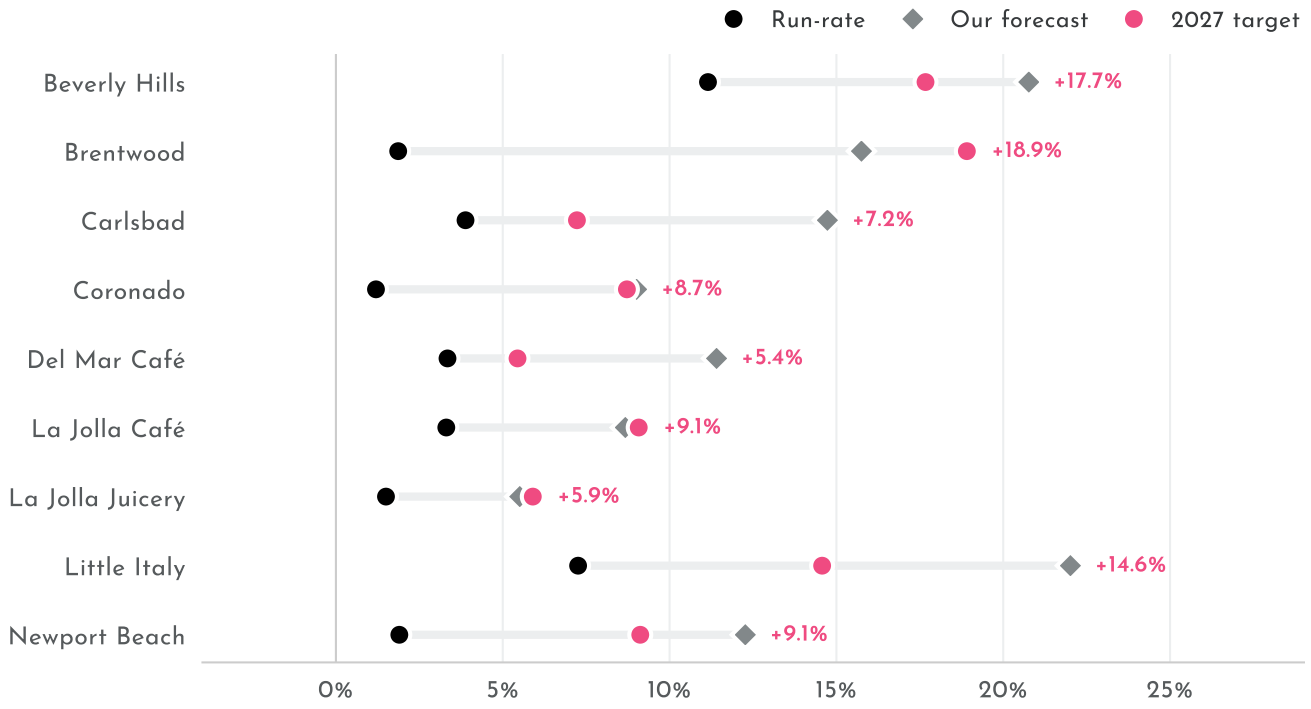

2027 targets: $30.67M for the nine cafés, $31.53M with La Jolla Cove

Each target is the café's objective in the October 15 budget, spread month by month along our most accurate forecast: one percentage over or under the forecast per café, −2.9% for the nine. The nine grow +10.3% on 2026, against +13.6% in our forecast and +3.9% at the run-rate.

How the targets are built

Nine existing cafés: the trend and the 2027 target

Top: actual to Sep 2026, Oct–Dec 2026 estimate (dotted), 2027 target in pink · bottom: the same without the season

- **Our most accurate forecast.** Three forecasting models, fitted café by café on Toast sales through September 2026 and blended, the most accurate in our tests: each café's 2027 by month, with its seasons and its trend. It grows the nine cafés +13.6%.
- **Set to the October 15 budget.** Each café's year is its objective in that budget; the forecast moves by one percentage per café, the same in every month, to land on it: from −6.5% at Carlsbad to +2.7% at Brentwood, −2.9% for the nine. La Jolla Café and the Juicery share their line in proportion to the forecast.
- **Day by day for payroll.** Each month is split into its days by our daily model, to the cent: *Parakeet_2027_Daily_Targets.xlsx*.
- **La Jolla Cove:** its objective in the budget: flat on 2026 through September, then $125K a month from the October 1, 2027 reopening.
- **No new menu price increase.** If prices go up in 2027, raise the targets by the same percentage from that month.

Tracking the targets through 2027

THE WORKBOOK

Parakeet_2027_Manager_Targets.xlsx has four tabs:

Targets 2027: each store's target by month and quarter, the year and growth on 2026.

Monthly tracking: enter each month's actual net sales from Toast; the variance against target fills in.

Year to date: target and actual to date by store, for the months entered.

Reference: each store's 2026 finish and 2027 under the budget, today's run-rate, our forecast and the target.

Parakeet_2027_Daily_Targets.xlsx: every 2027 day by store, the target and the run-rate, for staffing and payroll, adding up to each month to the cent.

A SUGGESTED MONTHLY RHYTHM

Close each month with the store's actual against its target and against the same month of 2026.

A store running ahead keeps its target; a store running behind for two months in a row gets a conversation about traffic (checks) and average check, not a lower target.

Re-forecast every quarter: the models update as actuals land, and we can re-cut the targets if the year moves materially.

DEFINITIONS

Net sales: Toast POS net sales after discounts; excluding tax, tips and gift-card sales. Del Mar Café appears as Carmel Valley in Toast.

Run-rate: the last 45 days (August 31 – October 14, 2026), seasonally adjusted and held flat with normal seasons; set by management for Coronado +1.2%, La Jolla Juicery +1.5% and Newport Beach +1.9% on 2026.

Target: each store's 2027 objective in the October 15 budget (“2027 Sales Objectives by Café”), by month along our most accurate forecast (the blend of three forecasting models) and by day from our daily model.

Budget: the investor budget workbook (2027_Sales_budget_Investors.xlsx), reviewed in Part 1.

Code: report/build_targets.py, report/build_daily_targets.py, src/runrate_scenario.py, src/import_budget.py, src/import_budget_pdf.py. The new cafés (Manhattan Beach, Sportsmen's Lodge, Boulangerie) are not included.
