Today's Run-Rate and 2027 Targets

Part 1: what the last 45 days say about 2026 and 2027, store by store, against the budget. Part 2: the 2027 sales targets for each store manager.

Nine existing cafés and La Jolla Cove · Toast POS net sales through October 14, 2026
Reviewing "2027 Sales Objectives by Café – Investors" (prepared by the CFO, October 2026)
Prepared October 15, 2026

2026 and 2027 at today's run-rate match the budget. The split by store does not.

01 **2026 holds.** At today's run-rate the nine cafés finish 2026 at $27.79M, −0.3% against the budget's $27.88M; 79% of the year is already booked.

02 **The 2027 budget is today's level.** Held flat with normal seasons, the nine sell $28.71M in 2027, −0.4% against the budget's $28.82M: the budget assumes no growth from here.

03 **But the split by store is off.** Set each café to its own run-rate and Beverly Hills, Del Mar Café, Carlsbad, Little Italy go up (+$338K); Coronado, Newport Beach, La Jolla Juicery, La Jolla Café, Brentwood come down (−$443K).

04 **Manager targets: our plan.** $31.30M for the nine (+12.6% on 2026) and $897K for La Jolla Cove with its remodel: $32.19M, by month and store, with a workbook to track actuals.

05 **What the targets ask.** 9.0% more than today's run-rate for the nine, about $215K a month: from 4% at La Jolla Café to 13% at Little Italy Café and Brentwood.

NINE EXISTING CAFÉS	BUDGET	TODAY'S RUN-RATE	MANAGER TARGET
2026 finish	$27.88M	$27.79M	–
2027	$28.82M	$28.71M	$31.30M
2027 growth	+3.4%	+3.3%	+12.6%

Growth on each column's own 2026 finish. Run-rate = the last 45 days of Toast sales, seasonally adjusted and held flat. Target = our plan (three forecasting models, leaning low).

WITH THE COVE Adding La Jolla Cove (remodeled October 2027): budget $29.69M, run-rate objective $29.58M, manager target **$32.19M**. New cafés are not in these numbers.

Today's run-rate

What the last 45 days say about 2026 and 2027, and what each store should be budgeted at.

A run-rate answers one question: what does each café sell if it simply holds today's level, with its normal seasons and no further growth?

Monthly net sales, nine existing cafés

Actual through September 2026 · from October: today's run-rate held flat, and the budget

01 Take each café's net sales for the last 45 days in Toast: August 31 to October 14, 2026.

02 Remove the season: divide each day by its usual pattern (day of week, time of year, holidays), learned from four years of the café's own sales.

03 That gives the café's underlying daily level today.

04 Hold it flat, put the normal seasons back and add up: the rest of 2026 and all of 2027, with no further growth.

Cross-check without a model (the 12-month average around September 2025, lifted by the 45-day growth on the same weekdays): within 5% for each of the nine cafés.

Sales, last 45 days nine cafés	Sales vs same days last year	Checks vs same days last year
$3.26M	**+17.0%**	**+12.0%**

Most of that rise is already in 2026's sales: held flat, today's level gives 2027 just +3.3% over the 2026 finish.

2026 finish: today's run-rate lands within 0.3% of the budget

79% of the year is booked. The budget estimates October–December at each café's Q3 growth rate; the run-rate holds today's level with no further growth, so it lands a little lower for most cafés.

Del Mar Café appears as Carmel Valley in Toast. The budget's January–September for Beverly Hills comes from its September sales report, $18K below Toast.

2027 at today's level lands within 0.4% of the budget: it is a no-growth plan

Held flat with normal seasons, the nine cafés sell $28.71M in 2027 against the budget's $28.82M. Both are about 3% above 2026: growth already locked in by 2026's rise, and nothing more.

Growth the budget needs = budget 2027 ÷ 2027 at today's run-rate − 1. A negative figure means the budget sits below today's level: it is met even if sales slip by that much.

Set each café to its run-rate: four go up, five come down

The total barely moves (−$106K for the nine), but the budget asks some cafés for growth and gives others room. Setting each café to its own run-rate fixes the split.

+42.6%	**+20.4%**	**+34.0%**

Held at its last-45-day level with normal seasons, Beverly Hills sells $2.90M in 2027, $139K more than the budget's $2.76M. It is still accelerating: +34.0% for January–September and +42.6% in the last 45 days, with checks +20.4%. About half the growth is more guests, half a higher average check.

RAISE TO RUN-RATE Proposed 2027 objective: $2.90M, +$139K against the budget (today's run-rate, no further growth).

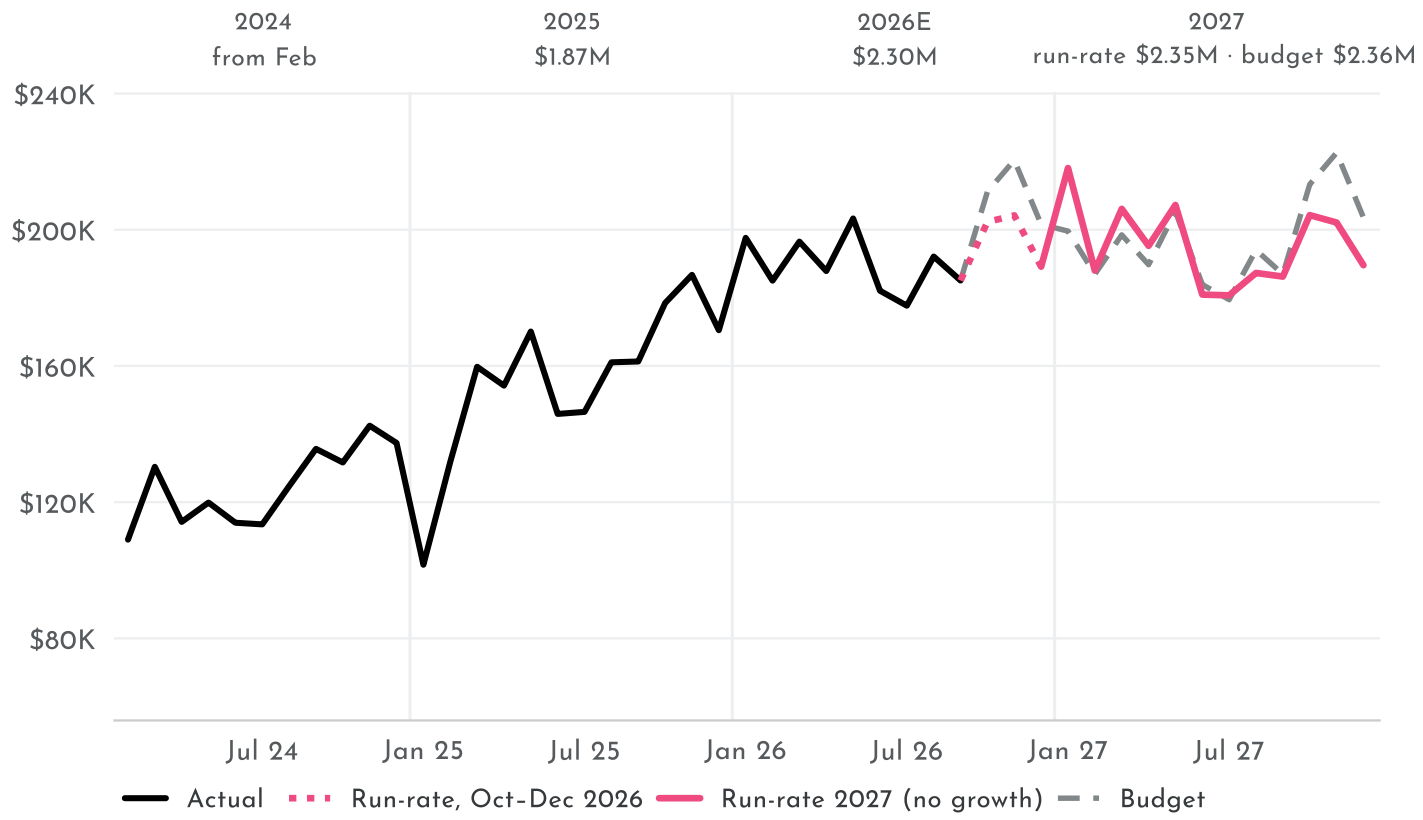

The budget's January–September 2026 (its September sales report) is $18K below Toast, so its Q3 growth reads +41.1% against +43.4% in Toast.

Brentwood has held at about $190K a month since January (between $178K and $203K). Held at its last-45-day level with normal seasons, Brentwood sells $2.35M in 2027, $18K less than the budget's $2.36M; the budget's +1.0% already allows for Leora opening next door. Its +13.7% on last year is still last year's ramp being lapped.

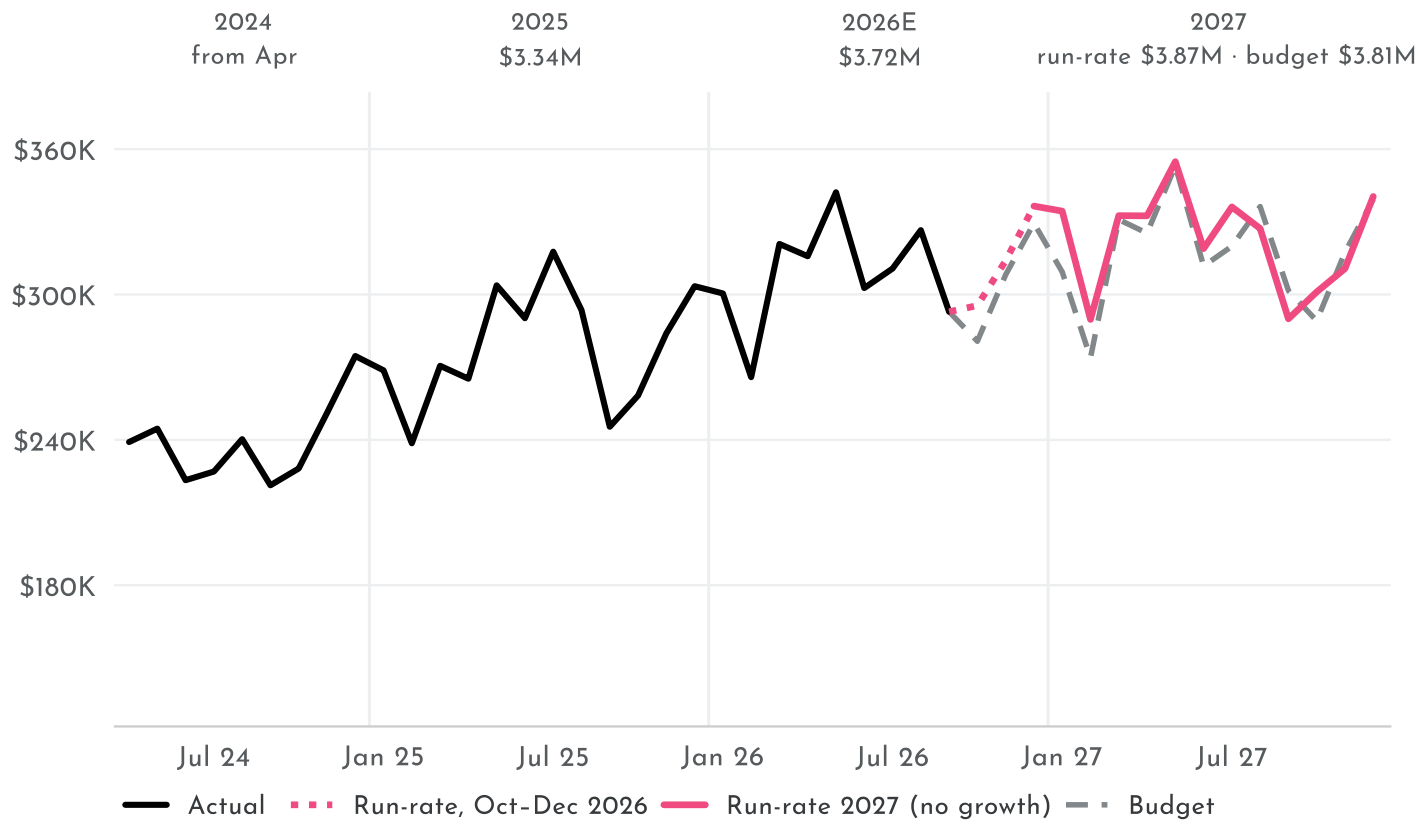

LOWER TO RUN-RATE Proposed 2027 objective: $2.35M, −$18K against the budget (today's run-rate, no further growth).

How the targets are built

Nine existing cafés by month: 2026 and the 2027 target

2026: actual January–September, run-rate estimate October–December

- **Our plan.** Three forecasting models (Prophet, SARIMA and Holt–Winters), fitted café by café on Toast sales through September 2026 and blended.
- **Leans low on purpose.** Shaded 0.9% under the models' best estimate, because missing high costs more than missing low.
- **Track record.** Forecasting January–September 2026 from September 2025, the blend came in 2.1% below actual sales.
- **Each café's own seasons**, month by month.
- **La Jolla Cove:** plan through September, then $125K a month from the October 1, 2027 reopening.

Tracking the targets through 2027

THE WORKBOOK

Parakeet_2027_Manager_Targets.xlsx has four tabs:

Targets 2027: each store's target by month and quarter, the year and growth on 2026.

Monthly tracking: enter each month's actual net sales from Toast; the variance against target fills in.

Year to date: target and actual to date by store, for the months entered.

Reference: each store's 2026 finish and 2027 under the budget, today's run-rate and the target.

A SUGGESTED MONTHLY RHYTHM

Close each month with the store's actual against its target and against the same month of 2026.

A store running ahead keeps its target; a store running behind for two months in a row gets a conversation about traffic (checks) and average check, not a lower target.

Re-forecast every quarter: the models update as actuals land, and we can re-cut the targets if the year moves materially.

DEFINITIONS

Net sales: Toast POS net sales after discounts; excluding tax, tips and gift-card sales. Del Mar Café appears as Carmel Valley in Toast.

Run-rate: the last 45 days (August 31 – October 14, 2026), seasonally adjusted and held flat with normal seasons.

Target: our plan, the blend of three forecasting models shaded 0.9% down.

Budget: the investor budget workbook (2027_Sales_budget_Investors.xlsx).

Code: report/build_targets.py, src/runrate_scenario.py, src/import_budget.py. The new cafés (Manhattan Beach, Sportsmen's Lodge, Boulangerie) are not included.
