Parakeet Café

2027 PAYROLL · OCTOBER 2026

Week Types and Hourly Templates

Each café's 2027 weeks grouped into a few types of week, and for each type the average week by day and hour, in sales and checks: the template to build the schedule on.

Ten cafés of the run-rate budget · 52 weeks, Jan 4, 2027 to Jan 2, 2028
Sales: today's run-rate by day for 2027 · hours and checks: Toast POS, Oct 2024 – Oct 14, 2026
Prepared October 21, 2026 · workbook: Parakeet_2027_Week_Templates.xlsx

Two or three types of week per café, each with its own week by day and hour

01 **Two or three types per café.** A café gets a new type only where its weeks sell at least 10% more than the type below, in runs of at least 4 weeks. Three types: Coronado, La Jolla Juicery, Little Italy Café and La Jolla Cove. Two (the minimum): Beverly Hills, Brentwood, Carlsbad, Del Mar Café, La Jolla Café and Newport Beach. No café needs four.

02 **The busiest weeks are summer at the beach.** Coronado's High weeks (Jun 28 – Aug 15) sell $104.3K a week, +60% on its Low weeks. Los Angeles goes the other way: Brentwood and Beverly Hills sell least in summer.

03 **20 holiday weeks get a template of their own**, where the week sells 10% more or less than its type: mostly Thanksgiving, Christmas, New Year's and spring break, busier at the beach and quieter at Brentwood. Beverly Hills, Carlsbad, Del Mar Café, La Jolla Café and La Jolla Juicery have none; their holidays are listed on the type's page.

04 **Same hours, different days.** The types differ in how much each day sells, not in how a day divides into hours: a pattern by type of week split the days no better than one per day of the week. Holidays keep their own hours (Thanksgiving closes early).

05 **At today's level.** The sales are the 2027 run-rate, with no growth: the templates on the calendar add up to it within rounding ($29.65M for the ten cafés over the 52 weeks). If the year runs at the manager targets, scale them up.

HOW TO USE IT

1. Find the week in the calendar (pages 4–5, or the Calendar sheet): it gives the week's type, or its holiday week.
2. Open the café's page for that type: sales and checks for every hour, Monday to Sunday.
3. Staff each hour to its sales and checks with your own productivity standard.
4. On a holiday listed on the type's page, adjust that day: the page says how much more or less it sells.

One page per café shows its year week by week and its types; then one page per type and one per holiday week. The workbook has every template, with formulas for the totals.

Weeks from the run-rate, hours from Toast

THE TYPES OF WEEK

Each café's 52 weeks of 2027 at today's run-rate (Monday to Sunday) are split into types in runs of at least 4 weeks, so a type always runs from one week to another; December runs on into January. The split keeps each week as close as it can to its type's level, and every change of type has to be worth about four weeks 5% off.

A café gets as many types as it can, up to four, while each type sells at least 10% more than the one below it; never fewer than two. Types are named by level: Low and High, or Low, Normal and High.

HOLIDAY WEEKS

Week 52 ends on Jan 2, 2028, past the run-rate: New Year's Day and the Sunday after are taken from Jan 1 and Jan 3, 2027. Weeks with a holiday (and spring break) do not move the types. Where one sells 10% more or less than its type's average week, it gets a template of its own; otherwise its holidays are listed on the type's page with what they sell.

LA JOLLA COVE

The run-rate carries the budget's remodeled café ($125K a month) from its October 1, 2027 reopening: its types are found on the weeks before, and the weeks after are one more type, Remodeled. Its hours follow today's café until the remodeled one has its own.

THE TEMPLATE OF A TYPE

The average of the type's weeks, day by day (holiday weeks with their own template left out), so the templates on the calendar add up to the run-rate. Each day is split into hours along the café's pattern for that day of the week: the hour each check was opened in Toast, Oct 2024 to Oct 14, 2026, recent days weighing more. Holidays follow their own pattern from earlier years. Checks are each hour's sales over the café's average check for that hour and day, last 12 months.

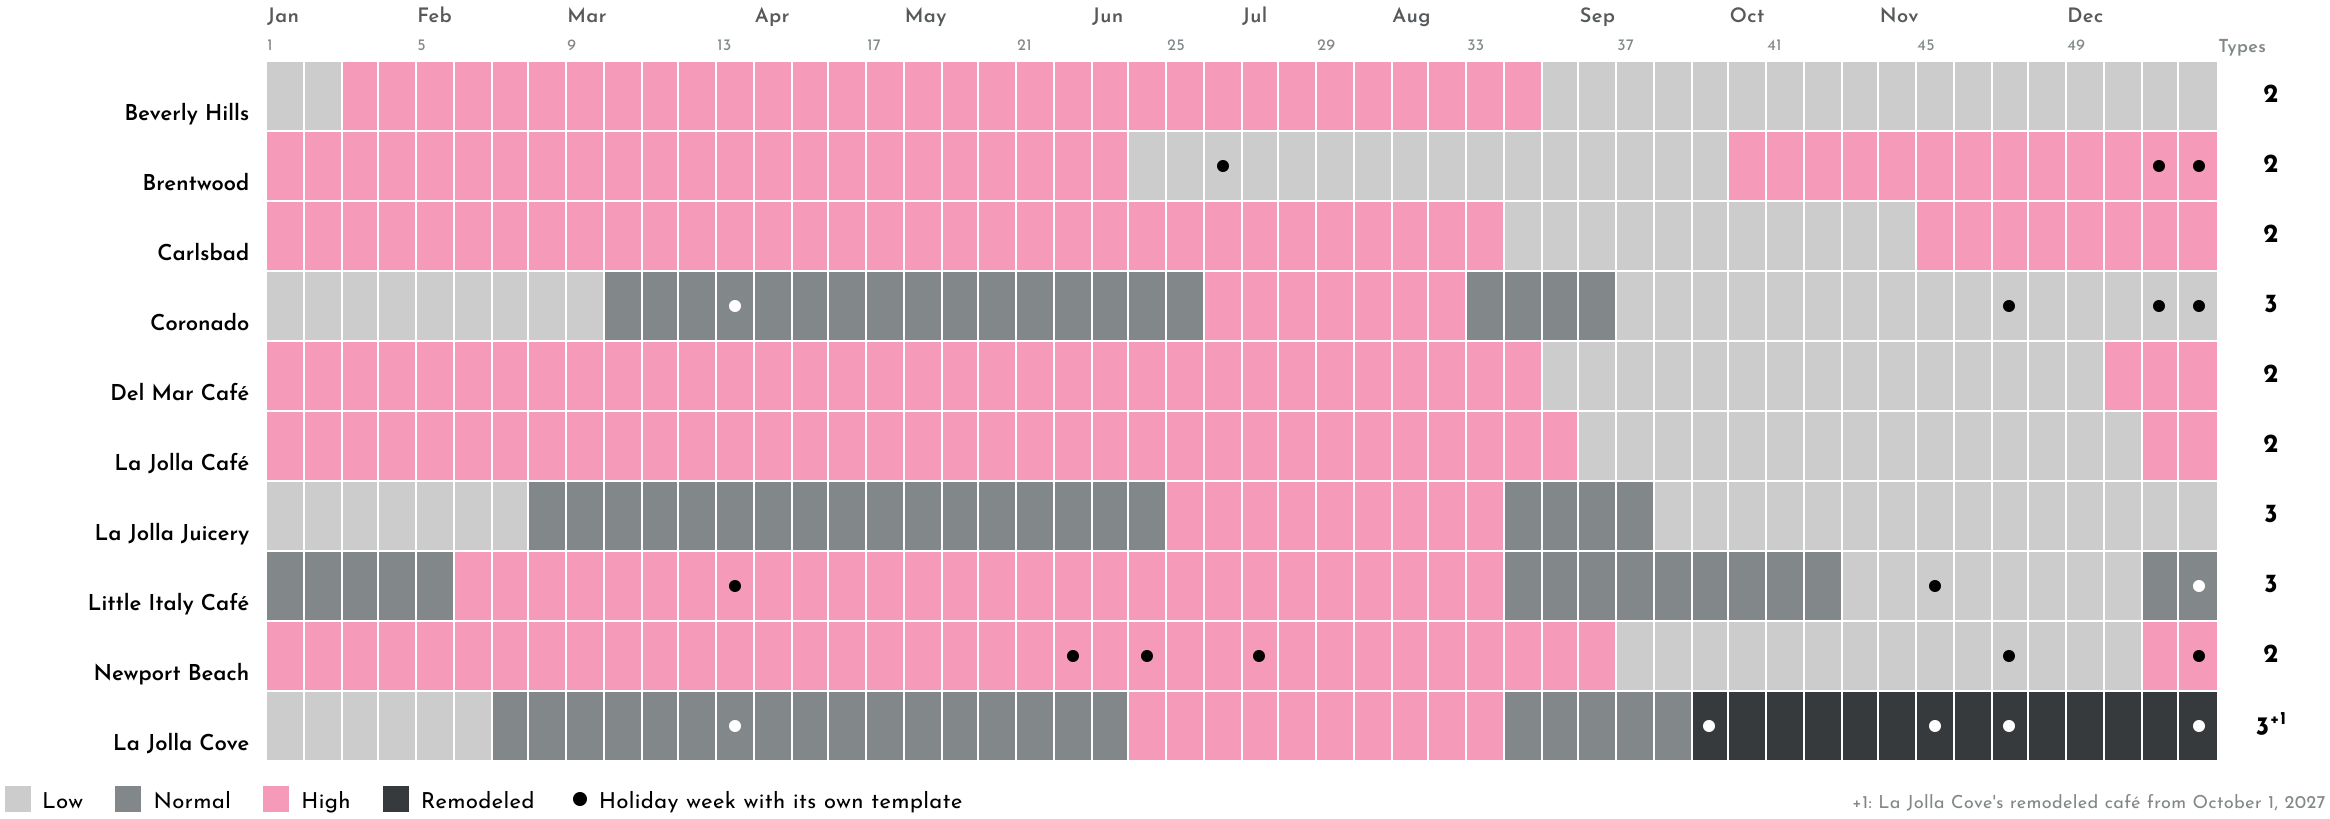

TESTED ON THE LAST YEAR

HOURLY ERROR, SPLITTING THE ACTUAL DAY	ERROR
One pattern per day of the week (used)	**21.3%**
One pattern per type of week and day	21.6%
Holidays: their own pattern (used) / the day's	**21.2%** / 26.1%
Recent days weigh more (half-life 180 days) / all equal	**20.7%** / 20.9%
Checks from the average check, last 12 months	15.6%

Error: each actual day split into hours and compared hour by hour (|actual − split| ÷ actual), learned on the year to Oct 14, 2025 and scored on the year after (recency and checks: learned to Apr 14, 2026, scored on the six months after). Most of it is the noise of a single hour on a single day; the averages on the pages are much steadier. Checks run about 3% high when prices rise.

Every week of 2027 and its type, café by café

Week 1 starts Monday Jan 4; week 52 ends Sunday Jan 2, 2028. A dot marks a holiday week with a template of its own.

+1: La Jolla Cove's remodeled café from October 1, 2027

The types at a glance: their dates and average week

Dates run Monday to Sunday; a type over the new year runs from the autumn into the next January–March. Holiday weeks with their own template sit inside these dates.

CAFÉ	LOW	NORMAL	HIGH	REMODELED	HOLIDAY WEEKS WITH THEIR OWN TEMPLATE
Beverly Hills	**$53.3K** a week Aug 30 – Jan 17 (over the new year)	–	**$57.0K** a week Jan 18 – Aug 29	–	none

BEVERLY HILLS LOW HIGH

Beverly Hills: two types of week

Low Aug 30 – Jan 17 (over the new year) ($53.3K a week); High Jan 18 – Aug 29 ($57.0K a week). Two types is the minimum: here they are 6.9% apart, under the 10% rule, so the weeks change little through the year.
