2027 Sales Objectives: A Second Look

The 2026 finish holds up. The 2027 objectives assume our cafés stop growing. What four years of Toast sales say, café by café.

Reviewing "2027 Sales Objectives by Café – Investors" (prepared by the CFO, October 2026)
Toast POS net sales, September 2022 – October 14, 2026 · prepared October 15, 2026

2026 holds up. The 2027 objectives assume our cafés stop growing.

01 **2026 holds up.** The budget's $27.88M finish for the nine cafés is within 0.2% of ours (Toast to September plus our October–December forecast) and within 2% café by café; 79% of the year is already booked. The one gap is scope: Nautilus ($0.49M) is not in the budget.

02 **2027 assumes growth stops.** +3.4% is about what the nine cafés would sell if they simply held their September level (+1% to +4%). They are growing 15% this year and 17% in October.

03 **Five cafés carry most of the gap.** Beverly Hills, Carlsbad, Del Mar Café, Little Italy and Newport Beach are growing 9%–34% this year and are budgeted at 1%–7%: 79% of the $2.5M gap between the budget and our plan.

04 **The budget is bolder than we are on new cafés.** Manhattan Beach and Sportsmen's Lodge are budgeted at $4.01M, 22% more than an average opening of ours would bring ($3.29M). We would also wait for the Cove remodel to trade before counting it.

WHAT WE SUGGEST
$30.85M +10.5%

OUR PLAN
$31.30M +12.1%

Growth on each one's 2026 finish ($27.88M budget, $27.93M ours). What we suggest = our plan where the data backs it, the budget where it doesn't. Our plan = three forecasting models, leaning low on purpose.

WE SUGGEST **$35.38M** for the total company in 2027, +$1.68M above the budget's $33.70M: raise six café objectives, keep three, add Nautilus, and budget the new cafés on our opening record.

PART 1

The 2026 finish

With two and a half months to go, how far off can the 2026 estimate be?

01 79% of the year is already booked

02 Our forecast for October–December

03 Café by café: the budget against our finish

04 The only real gap: Nautilus

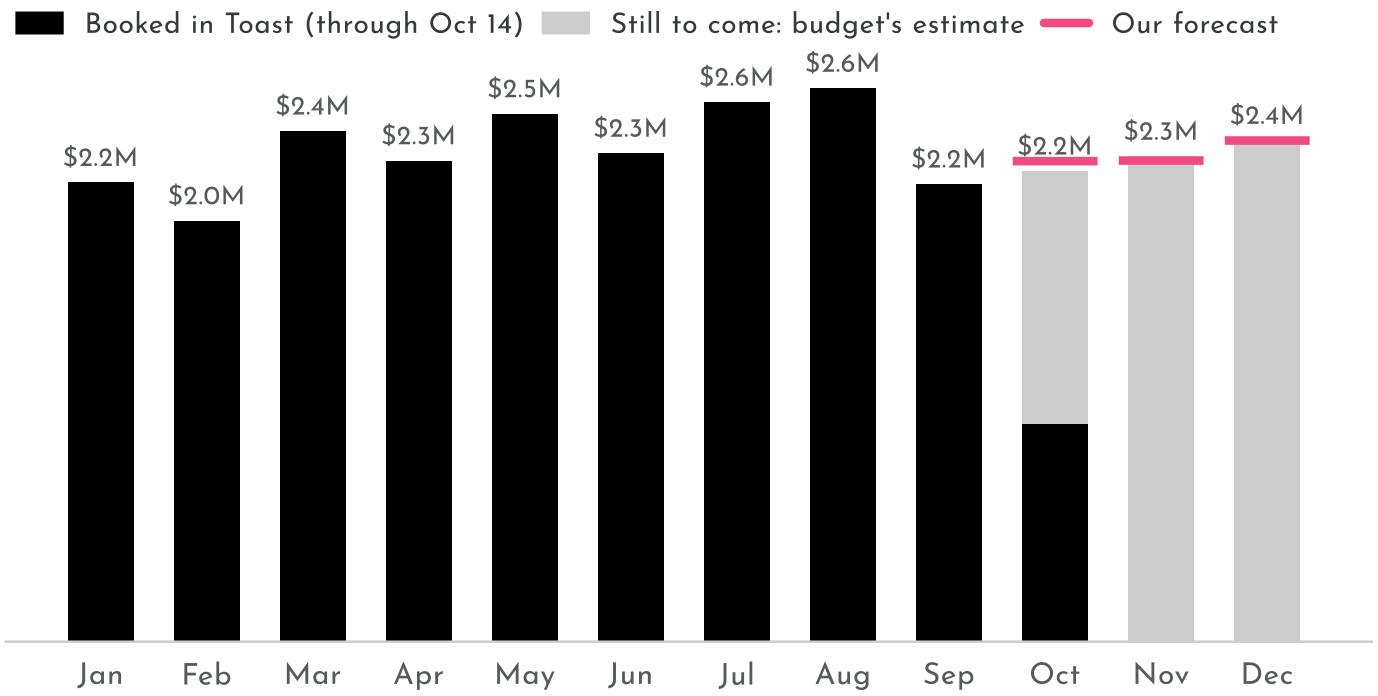

79% of 2026 is already booked, so the estimate can only move so much

Through October 14, Toast has recorded $22.04M for the nine existing cafés, 79% of the budget's $27.88M finish. The eleven weeks left would have to miss by 5% to move the year by about 1%.

HOW IT'S ESTIMATED The budget grows each café's October–December 2025 sales at its own Q3 2026 rate (+15.1% for the nine on the budget's figures). Our own forecast for the quarter, from the same three models we use for 2027, is on the next page.

Our own forecast for October–December lands within 1% of the budget's

We forecast the rest of 2026 with the same three models we use for 2027. For the nine existing cafés they expect $6.92M in October–December, $27K (+0.4%) more than the budget, and October so far is running slightly ahead of both.

Our finish = January–September Toast actuals + our models' October–December forecast. Budget columns come from the budget workbook; its January–September for Beverly Hills is $18K below Toast, so the columns do not add across for that café. Del Mar Café appears as Carmel Valley in Toast.

The only real 2026 gap is scope: Nautilus is not in the budget

The budget's total-company 2026 is $28.51M; our finish for all eleven cafés is $29.05M. 90% of the $544K difference is one café the budget leaves out.

Bars for the adjustments are drawn at 8× scale so they are visible next to the totals.

NAUTILUS

Our weekday-only café has traded all year: $0.36M in January–September (+27.3%) and $22K in October 1–14 (+46.5%).

It appears nowhere in the budget, neither among the existing cafés nor under new and remodeled cafés.

Question for the budget: is Nautilus closing, or reported somewhere else? If not, it adds $0.49M to 2026 and about $0.57M to 2027.

BOTTOM LINE Excluding Nautilus, the budget's 2026 and ours differ by $57K (0.2%). **We agree on 2026.** The disagreement is about 2027.

PART 2

2027

The objectives assume our cafés stop growing in January. Their sales say otherwise.

01 The budget is a no-growth plan

02 Every café is growing faster than its objective

03 Where the gap sits, and where the budget is bolder

04 Total company and what we suggest

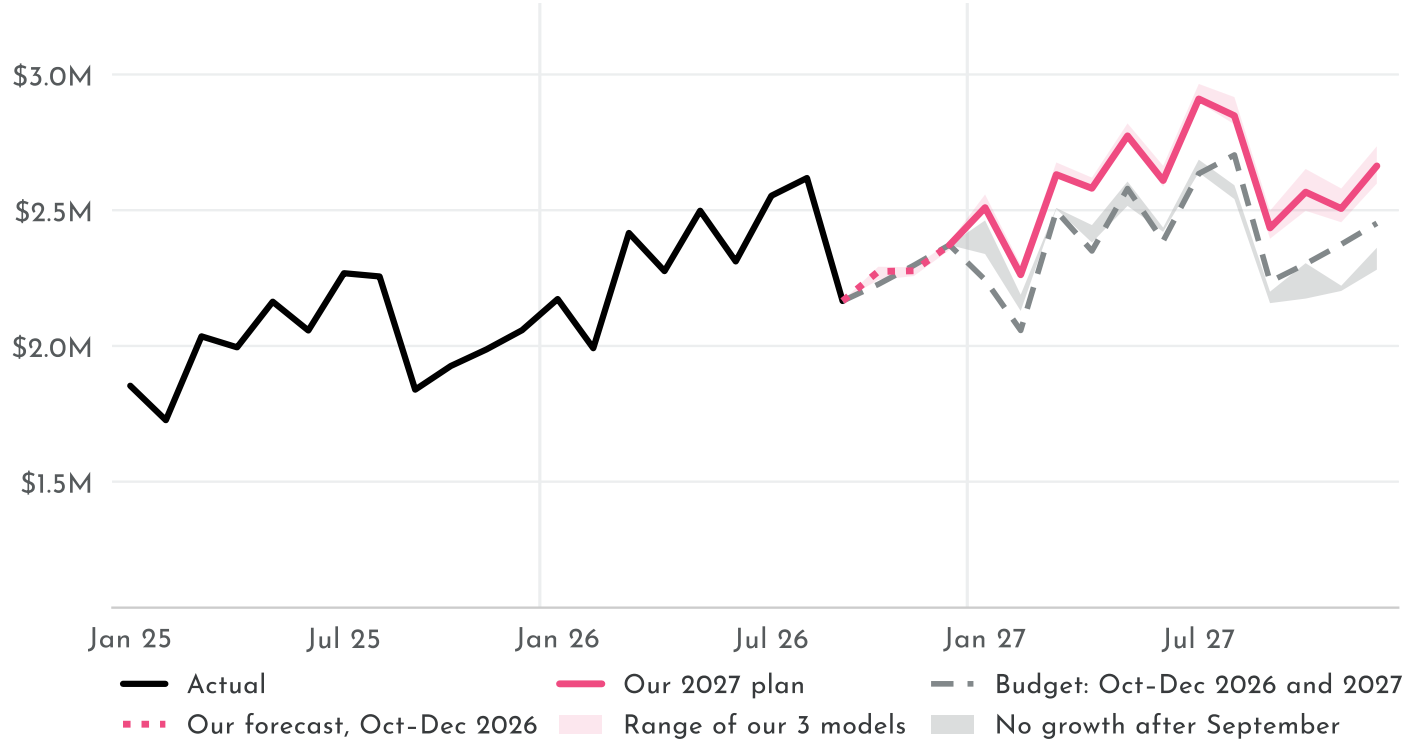

The budget's +3.4% is about what we'd sell if growth stopped today

Holding each of the nine cafés at its September level for all of 2027, with its usual seasonal swings, gives +1.3% to +3.9% on 2026 (two estimates). The budget sits in that range. Our plan assumes growth slows to 12%, not to zero.

The cafés added **$3.8M** in 2026. The budget adds **$0.9M** in 2027; our plan adds **$3.4M**.

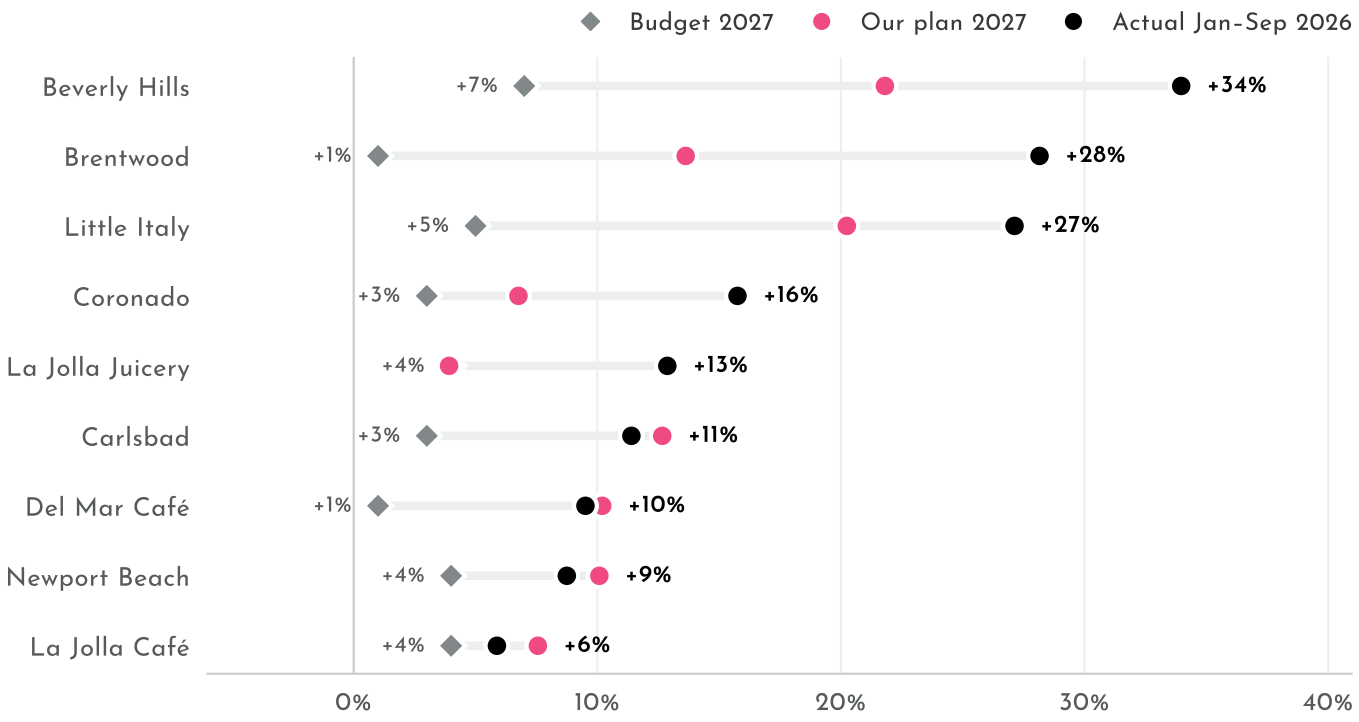

No-growth estimates: seasonal run-rate of Jul–Sep 2026 sales; and each café's Prophet trend held at its Sep 30, 2026 level

Every café is growing faster this year than the budget allows for 2027

For all nine cafés, the budget's 2027 growth is below what the café is delivering in 2026. For 5 of them it is below the café's slowest quarter on record.

Five cafés carry 79% of the $2.5M gap between the budget and our plan

Our plan is the blend of three forecasting models, shaded down because over-forecasting costs us more than under-forecasting. For 7 of the nine, the budget is below even our most cautious model. For three (Brentwood, Coronado, La Jolla Juicery) we still think the budget's number is fair.

Where the budget is bolder than we are: new cafés and the Cove remodel

Our models cannot see openings or remodels, so we check these lines against our own track record. Both lean high, and both are worth budgeting more cautiously.

NEW CAFÉS: BUDGET AGAINST OUR LAST FOUR OPENINGS

OPENING	FIRST 8 MONTHS	FIRST 10 MONTHS	FIRST 12 MONTHS
Newport Beach (Jul 2023)	$1.77M	$2.20M	$2.67M
Beverly Hills (Sep 2023)	$0.96M	$1.22M	$1.49M
Brentwood (Jan 2024)	$1.03M	$1.33M	$1.59M

Average opening	**$1.45M**	**$1.84M**	**$2.22M**
Budget: Manhattan Beach (opens Mar 1, 10 months)		$2.09M	$2.5M
Budget: Sportsmen's Lodge (opens May 1, 8 months)	$1.93M		$3.0M

BOTH OPENINGS IN 2027

Budget ramps: Manhattan Beach $142K in its first month, peaking at $270K in August; Sportsmen's Lodge $225K in its first month, peaking at $257K in December. Openings restated at 2026 prices (average check up 21% since 2023 and 9% since 2024). Boulangerie has no volume in the budget and none here.

LA JOLLA COVE REMODEL

Average month, 2026	Best month ever	Budget, Oct–Dec 2027
$55K	**$66K**	**$125K**
	Aug 2025	a month

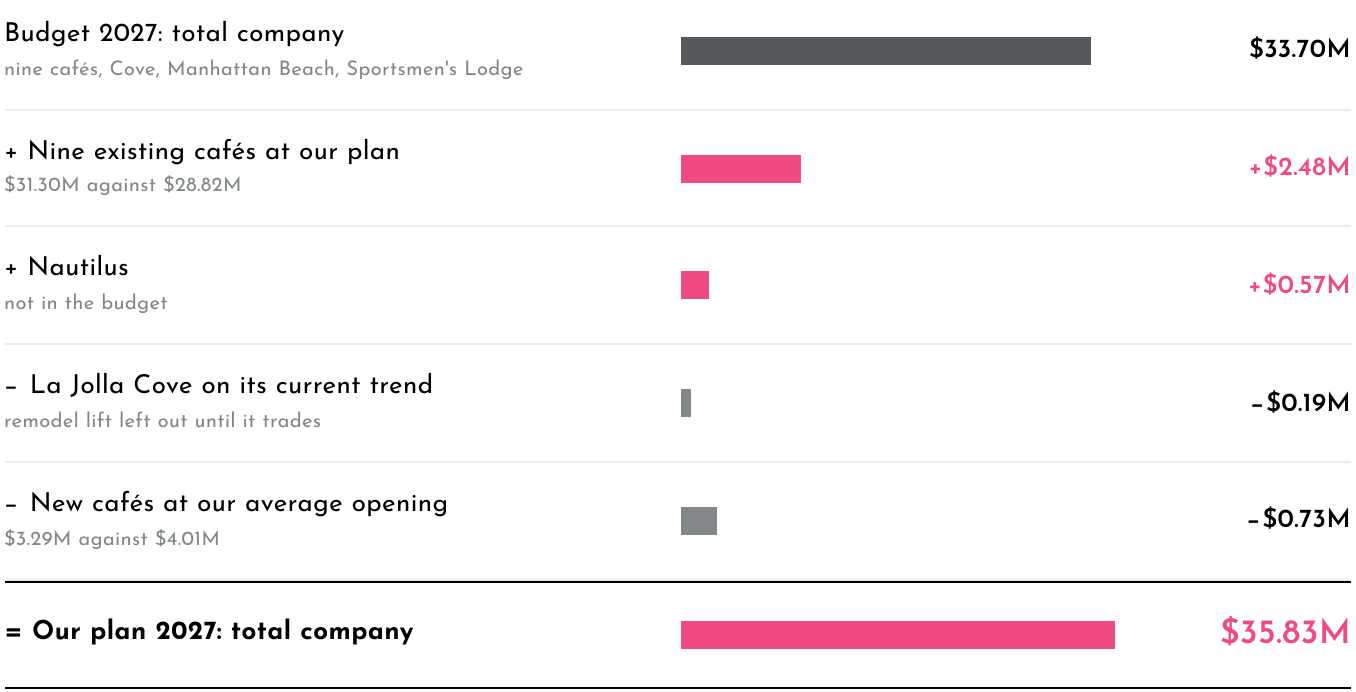

LA JOLLA COVE, 2027	BUDGET	CURRENT TREND
January–September	$0.49M	$0.52M
October–December	$0.38M	$0.16M
Year	**$0.87M**	**$0.68M**

The hotel around the Cove has been under remodel since March 2026, so the café is open but soft. The budget holds January–September flat to 2026, close to our view; the difference is October–December, after the October 1, 2027 reopening: a $1.5M annual rate, 2.3× today's monthly sales.

No café of ours has a remodel in its history, so we cannot test the lift. We would budget the trend and add the lift once the Cove reopens and trades.

Total company: $35.8M in our plan against $33.7M in the budget

The existing cafés and Nautilus add $3.0M; a more cautious view of the Cove remodel and the two openings takes back $0.9M. Net, the budget is $2.1M below our plan.

Adjustment bars at 4× scale. Boulangerie (opens April) has no volume in the budget or here. Growth on 2026: budget +18.2%, our plan +23.3% (on each one's 2026 total).

RISKS TO OUR PLAN

- **Brentwood has gone flat.** Sales have held near $190K a month since January; if that continues, our plan is about $278K high there.
- **Coronado is cooling.** Growth fell from +30% in Q1 to +6% in October; our lowest model puts it at $3.98M.
- **Competitors next door.** The budget expects them at Del Mar and Brentwood. Our models cannot see them; we would carry them as explicit risk lines.
- **A broad slowdown** would hit every café at once. Our plan already assumes growth eases from 16% to 12%.

What we suggest: $35.38M for 2027, +$1.68M above the budget

HOW WE GOT THERE

- **Raise six objectives** to our plan: Beverly Hills, Carlsbad, Del Mar Café, La Jolla Café, Little Italy Café, Newport Beach.
- **Keep three** where the budget's caution has support: Brentwood, Coronado, La Jolla Juicery.
- **Show judgment calls as their own lines**: competitors next door, the Cove remodel and openings beyond our track record are upside or risk, not the base.
- **Re-forecast every month** as actuals land; the models update themselves.

> Even the suggested $30.85M for the nine cafés assumes growth slows from 16% to 10%.

Brentwood stepped up in late 2025 and has held at about $190K a month since January (between $178K and $203K). This year's +28.2% growth is mostly that step being lapped: it fades to +10.2% in October 1–14, with checks −0.4% on a year ago. If sales hold this level, 2027 lands close to 2026, which is where the budget sits. Our models (+9% to +19%) still lean on the 2024–25 ramp.

THE BUDGET SAYS

"Moderating growth" · +3.0%

THE SALES SAY

Coronado had the strongest start to 2026 (+29.8% in Q1) and has cooled every quarter since: +14.2% in Q2, +7.8% in Q3 and +6.2% in October 1–14, with checks +3.3%. Our three models span $3.98M to $4.67M, and the budget's $4.13M is inside that range. The budget's "moderating growth" is a fair call; if today's pace holds, our plan of $4.31M (+6.8%) is the better number.

THE BUDGET SAYS

"Competitor next door (Goop Kitchen)" · +1.0%

THE SALES SAY

Del Mar is our largest café and one of the steadiest: every quarter since late 2023 has grown at least +7.3%, and October 1–14 is running +14.4% with checks +13.7%. The budget's +1.0% assumes Goop Kitchen next door takes about 9% of the sales our plan expects. Nothing in Del Mar's sales shows that so far.

THE SALES SAY

The hotel around the Cove has been under remodel since March 2026, so the café is open but soft: down 3.0% this year at about $55K a month (best month ever: $66K, Aug 2025). The budget holds January–September 2027 flat to 2026, which matches our view, then assumes a $1.5M annual rate ($125K a month) from the remodeled reopening on October 1, 2027: 2.3× today's average. How we built our numbers

THE DATA

Daily net sales and checks for every café from Toast POS (after discounts; excluding tax, tips and gift-card sales), September 2022 to October 14, 2026: 14,239 café-days.

The budget's 2026 estimates match these figures within 2% café by café, so both sides are measuring the same sales.

GROWTH MEASURES

Growth always compares the same days, months or quarters a year apart. Checks count guests' tickets; average check = net sales ÷ checks.

OUR FORECAST

Three standard forecasting models (Prophet, SARIMA and Holt-Winters) are fitted to each café separately and added up. Their settings were tuned on 2025 and tested on January–September 2026.

Our plan is the blend of the three, shaded 0.9% down: over-forecasting costs us about 3× more than under-forecasting, so the plan leans low on purpose.

Track record: forecasting January–September 2026 from September 2025, the blend came in 2.1% below actual sales across the nine cafés with two years of history at the time.

WHAT THE MODELS CANNOT SEE

New competitors, remodels, openings, closures and price changes. We treat these as judgment calls and show them as separate lines.

NO GROWTH AFTER SEPTEMBER

Two estimates of 2027 at today's level: Jul–Sep 2026 sales adjusted for each café's seasonal pattern and annualised; and each café's Prophet trend held at its September 30 level.

NEW-CAFÉ TRACK RECORD

Sales in the first 8, 10 and 12 months from the first trading day of Newport, Beverly Hills, Brentwood and Carlsbad, restated at 2026 average checks.
