Today's Run-Rate and 2027 Targets

Part 1: what the last 45 days say about 2026 and 2027, store by store, against the budget. Part 2: the 2027 sales targets for each store manager, at the budget's growth.

Nine existing cafés and La Jolla Cove · Toast POS net sales through October 14, 2026
Against the 2027 budget, "2027 Sales Objectives by Café" (October 2026)
Prepared October 19, 2026

2026 holds. The 2027 budget asks +10.0%, 6.2% more than today's run-rate; the targets follow it store by store.

01 **2026 holds.** At today's run-rate the nine cafés finish 2026 at $27.79M, −0.3% against the budget's $27.88M; 79% of the year is already booked.

02 **The 2027 budget asks for growth on top of today's level.** Held flat with normal seasons, the nine sell $28.89M in 2027, +3.9% on 2026; the budget's $30.67M (+10.0%) needs 6.2% more.

03 **The ask differs by store.** Over today's level the budget needs from 2.0% at Del Mar Café to 16.7% at Brentwood, flat all 2026 and given +17.0%.

04 **Manager targets: the budget's growth, store by store.** Each store's 2027 growth in the budget on our 2026 finish, spread by month with our forecasting model: $30.57M for the nine (+10.0%) and $879K for La Jolla Cove with its remodel, $31.45M in all, by month, day and store.

05 **What the targets ask.** 5.8% more than the run-rate for the nine, about $140K a month: from 2% at Del Mar Café to 15% at Brentwood and 7% at Beverly Hills.

NINE EXISTING CAFÉS	BUDGET	TODAY'S RUN-RATE	MANAGER TARGET
2026 finish	$27.88M	$27.79M	–
2027	$30.67M	$28.89M	$30.57M
2027 growth	+10.0%	+3.9%	+10.0%

Growth on each column's own 2026 finish. Run-rate = the last 45 days of Toast sales, seasonally adjusted and held flat (Coronado, La Jolla Juicery and Newport Beach set a little higher by management). Target = the budget's growth for each store on the run-rate's 2026 finish, by month from our forecasting model (three models, blended).

WITH THE COVE Adding La Jolla Cove (remodeled October 2027): budget $31.53M, run-rate with the remodel $29.76M, manager target **$31.45M**. New cafés are not in these numbers.

How we read the last 45 days

A run-rate answers one question: what does each café sell if it simply holds today's level, with its normal seasons and no further growth?

Monthly net sales, nine existing cafés

Actual through September 2026 · from October: today's run-rate held flat, and the budget · bars: growth vs the same month last year, same cafés

01 Take each café's net sales for the last 45 days in Toast: August 31 to October 14, 2026.

02 Remove the season: divide each day by its usual pattern (day of week, time of year, holidays), learned from four years of the café's own sales.

03 That gives the café's underlying daily level today.

04 Hold it flat, put the normal seasons back and add up: the rest of 2026 and all of 2027, with no further growth.

Cross-check without a model (the 12-month average around September 2025, lifted by the 45-day growth on the same weekdays): within 5% for each of the nine cafés.

Sales, last 45 days nine cafés	Sales vs same days last year	Checks vs same days last year
$3.26M	**+17.0%**	**+12.0%**

Most of that rise is already in 2026's sales: held flat, today's level gives 2027 just +3.3% over the 2026 finish (+3.9% with Coronado, La Jolla Juicery and Newport Beach set a little higher by management).

2026 finish: today's run-rate lands within 0.3% of the budget

79% of the year is booked. The budget estimates October–December at each café's Q3 growth rate; the run-rate holds today's level with no further growth, so it lands a little lower for most cafés.

Growth the budget needs = budget 2027 ÷ 2027 at the run-rate – 1. The budget shows La Jolla Café and La Jolla Juicery on one line (+7.5% for the two); both get that rate. † Run-rate set by management to Coronado +1.2%, La Jolla Juicery +1.5% and Newport Beach +1.9% on 2026 (the last 45 days alone give –1.5%, –1.2% and +0.6%).

Growth held at +14% to +23% a quarter; at the run-rate it fades to +1% by Q4 2027

Same-store sales of the nine existing cafés against the same quarter a year earlier. At the run-rate, growth fades through 2027 (+8.4% in Q1, +1.0% in Q4) as each quarter meets a 2026 quarter already at that level. The budget asks +10% every quarter; the targets in Part 2 run +9.1% to +11.3%, following each café's trend in our model.

Same-store: a café counts once it traded the same period in full a year earlier. Small figures give the number of cafés when fewer than nine (Newport Beach and Beverly Hills opened in 2023, Brentwood and Carlsbad in 2024). 2026 Q4 in italics: estimate. Budget: against its own 2026 (each café's 2026 months grown by its rate). Target: Part 2, against the 2026 finish. The 2027 run-rate includes the management adjustment to Coronado, La Jolla Juicery and Newport Beach.

The budget asks every café to grow beyond today's level: from 2.0% to 16.7%

Today's run-rate already carries the growth that 2026's rise locks in. The gap between each café's budget growth and its run-rate is what it has to add in 2027: 6.2% for the nine, most at Brentwood and Coronado.

Sales, last 45 days vs last year	Checks, last 45 days vs last year	Sales, Jan–Sep vs last year
+11.8%	**+10.4%**	**+8.7%**

Newport has settled into steady growth; sales are +11.8% on the same 45 days last year, with checks +10.4%. Set at +1.9% on 2026, Newport Beach sells $3.53M in 2027, $250K less than the budget's $3.78M: the budget needs 7.1% growth over that level.

BUDGET +9.0%

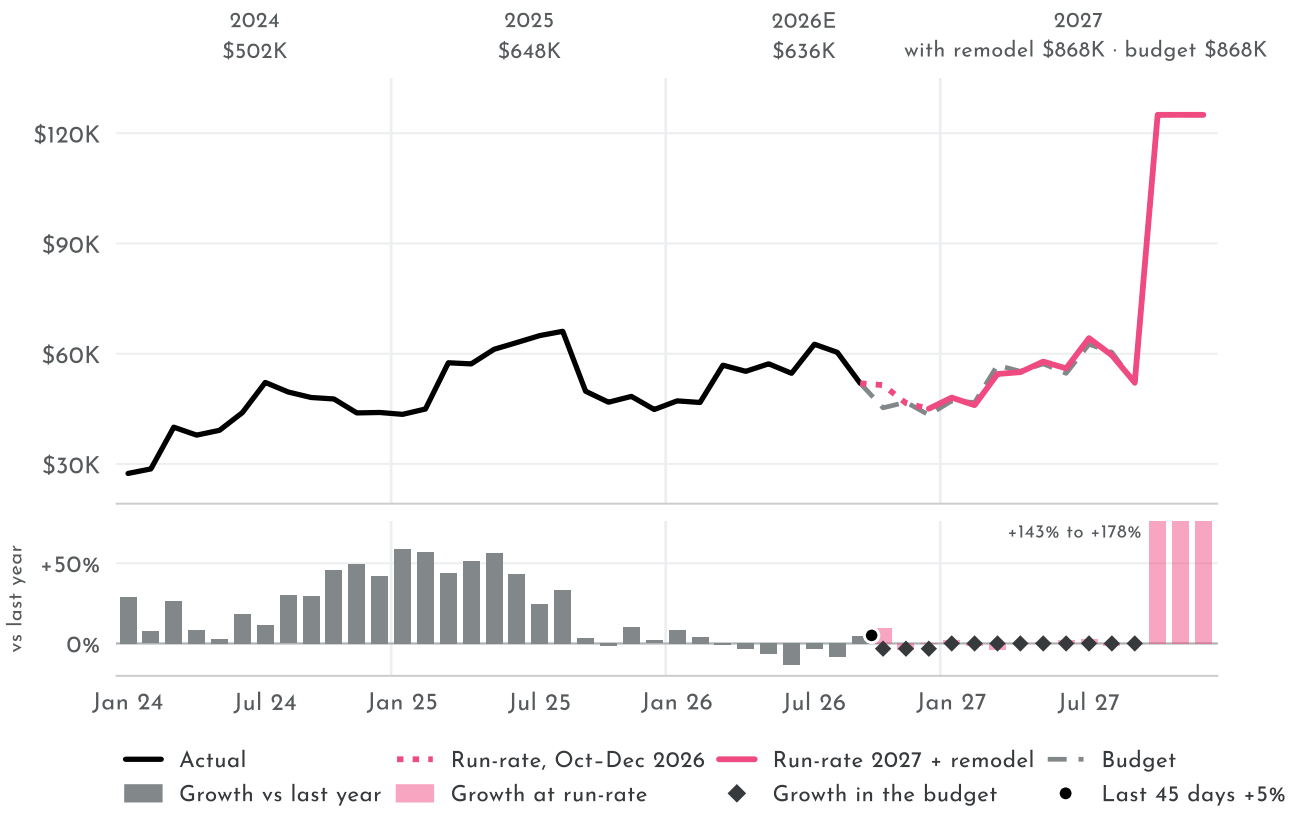

Budget 2027: $3.78M, +9.0% on its 2026 finish; key assumption: “Continued growth”. That is 7.1% over its adjusted run-rate. Part 2 sets the target at the same +9.0% on our 2026 finish: $3.78M.

The hotel around the Cove has been under remodel since March 2026, so the café is open but soft (−3.0% for January–September). At today's level it sells $493K in January–September 2027 ($637K for the full year); adding the budget's $125K a month from the October 1, 2027 reopening gives $868K, in line with the budget's $868K.

REMODEL OCT 2027 Budget 2027: $868K, flat January–September, then $125K a month from the October 1, 2027 reopening (+38.1% on its 2026 finish). Part 2 sets the target at the same +38.1% on our 2026 finish: $879K.

How the targets are built

Nine existing cafés: the trend and the 2027 target

Top: actual to Sep 2026, Oct–Dec 2026 estimate (dotted), 2027 target in pink · bottom: the same without the season

- **The budget's growth, store by store**, on our 2026 finish (Toast to October 14, then the run-rate): Beverly Hills +19.0%, Brentwood +17.0%, Little Italy +13.0%, Newport Beach +9.0%, Carlsbad +8.0%, Coronado +8.0%, La Jolla Café and Juicery +7.5%, Del Mar Café +5.5%. The nine come to +10.0%.
- **Month by month from our model.** Three forecasting models, fitted café by café on Toast sales and blended, give each café's 2027 path, its seasons and its trend; the year's target is spread along it, in cents. So the targets climb: the nine start at today's level in January and end 11% over it in December.
- **Day by day for payroll.** Each month is split into its days by our daily model, to the cent: *Parakeet_2027_Daily_Targets.xlsx*.
- **La Jolla Cove:** the remodeled $125K a month from the October 1, 2027 reopening; the rest of its target over January–September.
- **No new menu price increase.** If prices go up in 2027, raise the targets by the same percentage from that month.

Tracking the targets through 2027

THE WORKBOOK

Parakeet_2027_Manager_Targets.xlsx has four tabs:

Targets 2027: each store's target by month and quarter, the year and growth on 2026.

Monthly tracking: enter each month's actual net sales from Toast; the variance against target fills in.

Year to date: target and actual to date by store, for the months entered.

Reference: each store's 2026 finish and 2027 under the budget, today's run-rate and the target.

Parakeet_2027_Daily_Targets.xlsx: every 2027 day by store, for staffing and payroll, adding up to each month to the cent.

A SUGGESTED MONTHLY RHYTHM

Close each month with the store's actual against its target and against the same month of 2026.

A store running ahead keeps its target; a store running behind for two months in a row gets a conversation about traffic (checks) and average check, not a lower target.

Re-forecast every quarter: the models update as actuals land, and we can re-cut the targets if the year moves materially.

DEFINITIONS

Net sales: Toast POS net sales after discounts; excluding tax, tips and gift-card sales. Del Mar Café appears as Carmel Valley in Toast.

Run-rate: the last 45 days (August 31 – October 14, 2026), seasonally adjusted and held flat with normal seasons; set by management for Coronado +1.2%, La Jolla Juicery +1.5% and Newport Beach +1.9% on 2026.

Target: the budget's 2027 growth for each store on its 2026 finish, by month along our forecasting model's path (the blend of three models) and by day from our daily model.

Budget: “2027 Sales Objectives by Café” (2027 budget, October 2026). It gives years only; its months here are its 2026 months grown by each store's rate.
